

Ukraine War Update: More Arms from the West

January 16, 2023

USA, Canada, UK and Germany have come forward to provide even more sophisticated arms and financial support to Ukraine's budget during the last few weeks, after President Zelensky's visit to USA.

Kremlin Spokesman Dmitry Peskov

Kremlin said that more advanced weapons for Ukraine will not change the course of war. These will only lead to greater hardship for the people of Ukraine.

A few days before Christmas, Xi Jinping met chairman of the United Russia Party and former Russian president Dmitry Medvedev and German President Frank-Walter Steinmeier, a senior politician of the Social Democratic Party, DiGiNews360 guessed that some important efforts for a ceasefire agreement were afoot.

(Note: Steinmeier, as the then Foreign Minister of Germany, had played a key role in getting two Minsk Agreements approved in 2014 and 2015 to stop the fighting in Donbas.)

DiGiNews360 also noted that President Zelensky had a telephonic discussion with Prime Minister Narendra Modi of India and that he had started discussing 'Rebuilding of Ukraine' with Blackrock.

(Note: Prime Minister Narendra Modi has been consistently for peace in Ukraine at the earliest.)

*President of Germany: **Frank-Walter Steinmeier***

But the new developments show that the war in Ukraine may become even more ferocious.

On Friday, 20th January 2023, at a meeting at Ramstein, Germany, it is expected that the west will put forward all its most modern and costly arms for use by Ukraine. At Davos, leaders from NATO and European Union may join leaders from the East European, Baltics and Nordic countries to marshal support for Ukraine.
