IMPORTANCE OF JOINT ENGINEERING ENTRANCE EXAMINATIONS for the young in India:

More than a million students take the JEE Main, since it is the gateway to get admission into undergraduate engineering degree programs in most of the engineering colleges in India.

ADMISSION to IITs: To get admission into IIT, those who satisfy the requirements, specific to the Examination Board from which the students have passed 12<sup>th</sup> standard exam, candidates have to **first appear and qualify the JEE Main entrance exam**. It is conducted by the National Testing Agency twice a year - January and April.

After qualifying JEE Main, the next step is to appear for JEE Advanced exam. It is conducted every year by one of the IITs along with Joint Admission Board (JAB). Candidates who qualify JEE Advanced exam will be eligible to participate in the admission process at IITs.

JEE Mains may also be required to take admission into many other government colleges, other than IITs. For example, the 31 National Institutes of Technology and Government Funded Technical Institutes, managed by the Union Government and many of the State Government funded technical Universities and Engineering Colleges may also require a candidate to pass JEE Mains.

Hence the result in every State and District is highlighted in the local media. As an example, please see the following media Report from the District of Solan in the State of Himachal Pradesh at:
