

Security Council tries to show – It is not yet dead

February 20, 2023

After December 2016, during President Barrack Obama's Presidency, on 20th February 2023, U.S. Ambassador to the United Nations, Linda Thomas-Greenfield, told the Security Council that President Joe Biden's statement that United States does not support Israel's February 12 settlement plans is "real diplomacy at work".

Thereafter the Security Council seems to have formed a unanimous opinion to support the resolution, moved by UAE. The resolution says: that continuing Israeli settlement activities are dangerously imperiling the viability of the two-State solution based on the 1967 lines. The resolution is likely to be passed on Monday, 21st February 2023.

DiGiNews360.com sees that the Security Council is in reality telling the world that both the Security Council system and all the countries around Israel have failed to resolve the issue for more than 55 years. Every single action of building or modifying a single building, road or infrastructure project is studied, analyzed and critically examined by the whole of the world as if the issues, being faced billions of poor are of no importance before the impetuosity and cussedness of the two sides to the dispute. Both the sides have been holding the world to ransom, while killing people on the two sides continuously. No consideration is to be shown, no humane feeling is to be shown and the worst of human character is to be used in the name of religion to perpetuate the conflict.

Are no spiritual and kind persons, who can lead the opinion on the two sides to solve the problem, available in the whole of the Muslim and Jewish world?
