

US Presidential Election:

A Third Candidate: Challenge to 2-Parties in USA

June 6, 2023

Jun 4, 2023: Shannon Bream on “Fox News Sunday”: Senator Joe Manchin (D-W.Va) was asked whether he would like to run as a third-party Presidential candidate. He side-stepped the question. Though he mentioned that the people did not like the movement to the ‘far right’ or ‘far left’ and that the people wanted to be governed from the middle, he offered no solutions.

Gov. Jim Justice (R-W.Va.) has announced his intentions to challenge Manchin for his Senator’s seat in 2024.

In USA, a bipartisan group called “No Labels” is trying to find a “unity ticket” candidate to run as a 3rd party in the 2024 elections.

www.DiGiNews360.com wants to say that the definition of ‘the left’ and ‘the right’ differs from country to country.

In South American countries, any party, which is against close relations is considered to be a party of ‘the left’. This badge of leftism can be finally confirmed, in South American terminology, if a country of South America decides to have closer relations with China, as if China were a model of implementation of the Marxist theories.

*In India, BJP is said to be on the right, whereas **its policies** during the 9 years of Prime Minister Narendra Modi or the then Prime Minister Atal Behari Vajpayee from 1999 to 2004 have been **a little to the left**, as the term is understood in US politics.*
