

A PERSONAL HOMAGE to the late Ratan Tata

October 18, 2024

AN EXPERIMENT: Without any special arrangements and with only my laptop and my mobile, I have prepared **a video on the late Ratan Tata, as my personal homage**. The video has been loaded on YouTube at:

Our Globe Today – News and Views

i.e. at

<https://youtu.be/ehAUCsnb7UI?si=pDYgrwarwvH3rn4z>

Please visit it and please share it with friends.

The video states the view-point of

www.DiGiNews360.com

that the late Ratan Tata was the most powerful Businessman of the Globe. The Prime Minister Narendra Modi, like Jamwant, diagnosed the Hanuman Syndrome and tried to use the natural patriotic instincts of the late Ratan Tata for initial investments in sophisticated state-of-the-art semiconductor ICs and smart electronic products, according to the evolving needs of the 4th Industrial Revolution.

The large Indian market and the markets of the Arabia and the world can be easily served by the young Indian engineers for designing and producing beautiful 'personalized conveniences' for daily use. Once the initial products are in the market, India has many engineering companies, which can dominate the world's markets.
